***Allowable Subject Matter***

1. Claims 1-5, 12-15 are allowed.
2. The following is a statement of reasons for the indication of allowable subject matter:

In response to the office action dated 10/13/04, applicants have cancelled claims 6-11, 16-22. The present invention relates to method and apparatus for reporting a voice service load to a mobile station in a system supporting both a voice service and a data service. Pilot signal is transmitted continuously or periodically for initial acquisition and channel estimation in not new in the art. Prior art of record, taken individually or collectively, fails to fairly teach method and apparatus for transmitting two pilot signals with two different orthogonal codes in a base station, wherein the two pilot signals are derived from the same pilot bits and associated with different gain value according to the transmission power, as claimed, in independent claims 1, 5, 12 (claims 2-4, 13-15 depend therefrom). Thus, claims 1-5, 12-15 are found to be novel and unobvious over prior art of record.

***Conclusion***

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Kim et al. (US 6,493,333) disclose Device And Method For Controlling Transmission Power Of Punctured Frame.

Moon et al. (US 6,577,608) disclose Communicatin Control Device And Method For CDMA Communication System.

Park et al. (US 6,810,264) disclose power Controlling Apparatus And Method IN Mobile Communication System.
